# Workshop Series

Workshop	Date	Location	Registration
How to think in Code	Jan. 28 1PM-3PM	EDUC 133	Closed
Intro to Git & GitHub	Jan. 30 1PM-5PM	EDUC 133	Closed
Intro to Unix	Feb. 6 1PM-5PM	EDUC 133	Closed
Intro to Python (Part 1)	Feb. 11 1PM-5PM	EDUC 133	<a href="#">Open</a>
Intro to R (Part 1)	Feb. 13 1PM-5PM	EDUC 133	<a href="#">Open</a>
Exploring MATLAB	Feb. 18 1PM-5PM	EDUC 133	<a href="#">Open</a>
Statistics in R (Part 2)	Feb. 20 1PM-5PM	EDUC 133	<a href="#">Open</a>
Data Processing in Python	Feb. 25 1PM-5PM	EDUC 133	<a href="#">Open</a>
Intro to Machine Learning	Mar. 13 1PM-5PM	EDUC 133	TBA
Intro to R (Part 1)	TBA	EDUC 133	TBA
Intro to Python (Part 1)	TBA	EDUC 133	TBA

# Outline

- 1. Module 1 – Modules and Packages (40 minutes)**
  - a. Using Modules
  - b. A Brief Intro to Package Management
  - c. Exercise
- 2. Module 2 – Introduction to NumPy Arrays (50 minutes)**
  - a. Introduction to Arrays
  - b. Introducing NumPy
  - c. Array Operations
  - d. Exercise

# Outline

## 3. **Module 3 – Visualising Data with Matplotlib (50 minutes)**

- a. Creating Plots with Matplotlib
- b. Exploring the Matplotlib Documentation
- c. Exercise

## 4. **Module 4 – Intro to Tabular Data with Pandas (30 minutes)**

- a. Fundamentals of pandas
- b. Exploring the pandas Documentation

## 5. **Module 5 – A Brief Guide to Exploring the Unknown (10 minutes)**

- a. What to learn next? How?
- b. How to get help and how not to get help
- c. Other cool programming topics

# Interactive Workshop!

- That's pretty much all that will be in the slides... For the rest, we'll go to a Jupyter Notebook:

**To the repository!**

# Module 4

## Intro to Tabular Data with pandas

By name: `my_df.loc`

	Series 0	Series 1	Series 2
Row 0	<code>["row 0", "series 0"]</code>	<code>["row 0", "series 1"]</code>	<code>["row 0", "series 2"]</code>
Row 1	<code>["row 1", "series 0"]</code>	<code>["row 1", "series 1"]</code>	<code>["row 1", "series 2"]</code>
Row 2	<code>["row 2", "series 0"]</code>	<code>["row 2", "series 1"]</code>	<code>["row 2", "series 2"]</code>

By integer number: `my_df.iloc`

	Series 0	Series 1	Series 2
Row 0	[0, 0]	[0, 1]	[0, 2]
Row 1	[1, 0]	[1, 1]	[1, 2]
Row 2	[2, 0]	[2, 1]	[2, 2]

# To summarize

- ✓ **Modules** and **packages** allow for code written by others to be easily imported and reused.
- ✓ **NumPy arrays** allow easily storing many numbers and performing operations without having to loop.
- ✓ **Matplotlib** can be used to generate many different types of plots.
- ✓ **pandas DataFrames** represent data in tables.
- ✓ Big projects have **documentation** to explain their functionality.

## Now you are ready to:

- Import code from existing modules and packages.
- Use NumPy to easily process multidimensional data.
- Use Matplotlib to generate different types of plots to visualise data.
- Approach a new package and explore its documentation and examples.

# Acknowledgements

- Thank you to QLS-MiCM for giving me this opportunity and for helping me along the way.
- Thank you to the professors from the McGill School of Computer Science for helping me along my programming journey and for inspiring me to share my programming experience with others.
- Thank you to Professor Mathieu Blanchette, whose COMP 204 course helped introduce me to Python (back in Fall 2018).
- Thank you to the Python, NumPy, Matplotlib and pandas communities!
